Seaman PAPER

Retail Packaging

PAPER

Wrapping tissue, the final essential component of the package. It is the finishing touch that adds a subtle, yet elegant look that enhances a brand's image by offering a dynamic visual impact that the customer takes home.

Seaman Paper is a true global manufacturer and supplier of coloured and printed wrapping tissue for the retail packaging market.

We lead our industry by continually innovating our product line, maintaining the highest standards of sustainable practices and investing in our global expansion to keep up with customer needs.

Due to these three factors, along with our passion and dedication to our products, Seaman Paper has grown to become the preferred tissue supplier to many of the world's largest brands and retailers.

One of the key factors to our success has been the commitment to service our customers on a global level.
This has resulted with a strong focus on our worldwide expansion, positioning Seaman to supply our customers locally and consistently anywhere in the world.

- 2. Embossed Tissue
- 3. Hot Stamp Tissue
- 4. Gemstones
- 5. Watermarking
- 6. Digital Printing

Being sustainable is ingrained in our organization and is a part of the fiber of our existence. It is considered with every decision we make, every process we execute, every product, every person, and every customer we serve.

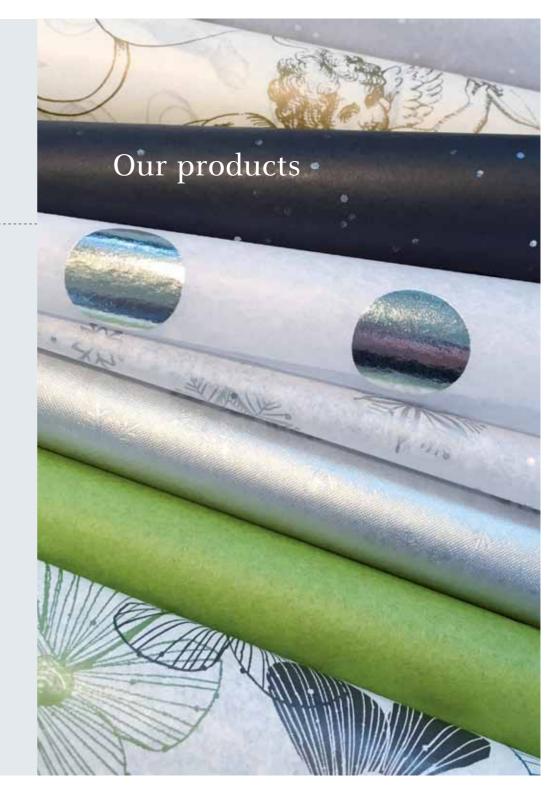

- 1. Global certifications include: FSC, PEFC, SFI, ISO 14000, ISO 90001 and SA8000
- 2. Recycled content / 100% post-consumer waste available
- 3. Biomass energy from wood waste and landfill gas are sustainable energy sources
- 4. Recognized by the American Forest and Paper Association with the 2015 sustainability award.

When it comes to selecting the tissue component of your packaging process, it is important to understand the many possibilities that are available today. By focusing solely on tissue paper related products, we have the experience and knowledge to help our customers find the right solutions. In our USA made premium SatinWrap program, we offer 68 bleed-proof fashion colours, specialty sequin Gemstone tissue, printed designs, and more. Additionally, we also offer our Chinese made line, SilkTissue.

Coloured tissue – SatinWrap / Silk Tissue Stocked in Europe, Hong Kong, USA

Printed Tissue Available in Italy, Asia, USA

A well designed printed tissue is the perfect way to compliment your packaging. As experts in our field, we have a strong knowledge of the various printing techniques on tissue. By utilizing our printing & converting factories around the world, we are able to offer unique tissue solutions to the retail packaging market.

These products include:

- 1. Hot stamping
- 2. UV varnishing Silk printing
- 3. Process printing
- 4. Pantone colours
- 5. Metallic ink
- 6. Embossing

Hot stamping

Hot stamping is a printing process that transfers foil from a film onto the tissue paper. With a variety of colours to choose from, Hot Stamping is the perfect way to promote your brand with a high-end and elegant tissue.

Pantone colours

The Pantone Matching System (PMS) is a universal and standardized colour chart commonly used in printing. Quite often companies will refer to a Pantone number in order to match a specific colour, reinforcing the brands identity.

UV varnishing

UV printing uses a special ink that can make the printed surface appear shiny, semi-transparent or matte. The ink is dried immediately by exposure to ultraviolet light which gives the tissue a stylish finish and texture.

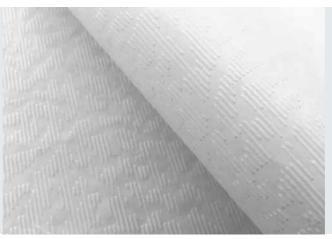

Metallic ink

Printing with metallic ink provides an elegant alternative to nonmetallic colours. The most common metallic inks are gold, silver and bronze, however any metallic pantone colour can be selected.

Process printing

Process printing uses
1 to 4 colours layered
over each: cyan, magenta,
yellow and black (or
CMYK). This technique
is often spot printed,
allowing very detailed
images to be reproduced
on the tissue paper.

Embossing

Embossing is an alternative to printing with inks or foils, while still branding the tissue. The tissue runs through 2 embossing rolls, leaving an impression on the paper which gives it a subtle, textured feeling.

With the rise of technology, it is no secret that the paper industry has seen a slowdown in past years. However, due to the unique characteristics and applications of our products, tissue paper has held its position in the ever changing global market. Today, tissue is even more valuable than ever due to the environmental, versatile, and economical benefits it brings to a packaging experience. For this reason we are ready for the challenge. And our numbers prove it.
