

EE260

Heated Humidity and Temperature Probe for Meteorological Applications

The EE260 probe is optimized for accurate and reliable relative humidity (RH) and temperature (T) measurement in meteorology and demanding outdoor applications.

Innovative, Compact Design

The design of the EE260 integrates a heated humidity sensing head and an additional T sensing element into one single compact probe. The device is thus compatible with rotation symmetric radiation shields.

Measurement Performance

The dual heating system prevents condensation on the RH sensing element, on the probe head and on the filter cap, which leads to very short response time and fast recovery after condensation. Furthermore, it enables precise RH measurement even under continuously high humidity and condensing conditions.

Versatility

Besides the measurement of RH and T, the EE260 calculates other humidity related quantities like dew point temperature (Td), absolute humidity (dv) and mixing ratio (r).

Reliability, IP67 Protection Class

The proprietary E+E coating protects the RH sensing element and its leads against corrosive and electrically conductive pollution. The encapsulated electronics are optimally protected against environmental influences.

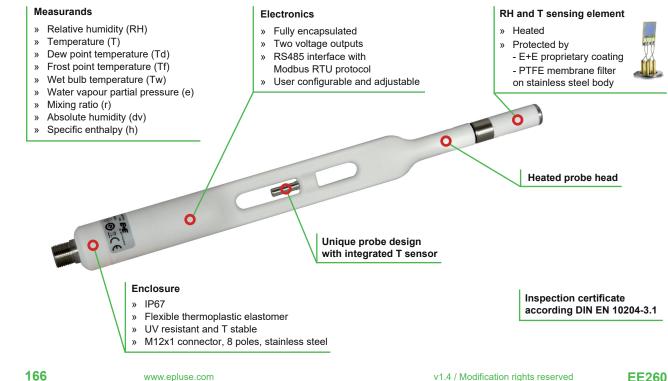

Analogue Outputs and Digital Interface

The EE260 features two freely configurable and scalable voltage outputs as well as an RS485 interface with Modbus RTU protocol. The measured data is available at the analogue and digital interfaces simultaneously.

User Configurable and Adjustable

An optional configuration adapter and the free PCS10 Product Configuration Software facilitate the configuration and adjustment of the EE260.

Features

EE260

Protective Sensor Coating

The E+E proprietary sensor coating is a hygroscopic layer applied to the sensing elements, their leads and soldering points. The coating substantially extends sensor life-time and ensures optimal measurement performance in corrosive environments (salts, off-shore applications). Additionally, it improves the long term stability of E+E sensors in dusty, dirty or oily applications by preventing stray impedance caused by deposits on the active sensor surface or on the electrical connections.

Technical Data

Measurands			
Relative humidity			
Measuring range	0100 % RH		
Sensing element	E+E HMC01, heated		
Response time t ₉₀ at 20 °C (68 °F)	< 15 s		
Accuracy ¹⁾ (incl. hysteresis, non-linearity and re	epeatability)		
-1540 °C (5104 °F) for RH ≤ 90 %	± (1.3 + 0.3 % *mv) % RH mv = measured value		
-1540 °C (5104 °F) for RH > 90 %	± 2.0 % RH		
-2560 °C (-13140 °F)	± (1.4 + 1 % *mv) % RH		
-4025 °C (-4013 °F)	± (1.5 + 1.5 % *mv) % RH		
Temperature			
Measuring range	-6060 °C (-76140 °F)		
Temperature sensor	Pt100 1/3 DIN B		
Response time, typ. ²⁾	t ₆₃ ≤ 20 s		
^{∆T} [[°] C] Analogue output	RS485 interface		
0.5	ΔT [°C]		
0.45	0.4		
0.3	0.3		
0.2	0.2		
0.15	0.1		
-60 -50 -40 -30 -20 -10 0 10 20 30	40 50 60 -60 -50 -40 -30 -20 -10 0 10 20 30 40 50 60		
Outputs ³⁾			
Analogue	0 - 1 V / 0 - 2.5 V / 0 - 5 V / 0 - 10 V		
Freely selectable and scalable	0 < I _L < 1 mA		
Digital interface	RS485 (EE260 = 1 unit load)		
Protocol	Modbus RTU		
Default settings	Baud rate 9600 ⁴⁾ , parity even, 1 stop bit, Modbus address 235		
General			
Supply voltage	7 - 30 V DC		
Power consumption, typ.	300 mW (25 mA @ 12 V DC, heating included)		
Electrical connection	M12x1, 8 poles, stainless steel 1.4404		
Filter	PTFE membrane, stainless steel body		
Protection class	IP67		
Enclosure material	Thermoplastic elastomer, UV resistant and T stable		
Electromagnetic compatibility ⁵⁾	EN 61326-1 EN 61326-2-3 UK CC		
	FCC Part15 ClassA ICES-003 ClassA CA C		
Operating and	-6060 °C (-76140 °F)		
storage conditions	0100 % RH (operation)		
-	095 % RH non-condensing (storage)		

1) The accuracy statement includes the uncertainty of the factory calibration with an enhancement factor k=2 (2-times standard deviation). The accuracy was calculated in accordance with EA-4/02 and with regard to GUM (Guide to the Expression of Uncertainty in Measurement).

3) At air speed > 15 m/s
3) The EE260 simultaneously features two analogue voltage outputs and the RS485 interface.

4) Supported baud rates: 9600, 19200, 38400, 57600, 76800 and 115200; find more details about communication setting in the User Manual and the Modbus Application Note at www.epluse.com/ee260

5) Compliance with EN61000-4-3 and EN 61000-4-6: Electromagnetic interferencees may cause additional deviations <2 % RH.
