

Meter connection columns/-cabinets · PV-systems and other regenerative Energies

Cabinets outside installation: WM-ZPEA 16

Columns outside installation: ZAS-S-1-EA12

Wall cabinet interior: WM-WS-EA16

Cabinet outside installation: VS PV ...

We deliver direct and measuring transformers up to a capacity of 700 kW. Furthermore, we also offer cabinets to combine all individual inverted rectifiers (optional with monitoring technology) and transformer and transmission stations.

Housing parts

- Material: complete polyester, glass fibre reinforced; sheet steel
- Weather-resistant, impact and shock resistant, difficult to inflame
- Effective ventilation
- Modular system with exchangeable individual parts (outdoor distribution box)
- Door and back wall with moulded surface (outdoor distribution box)
- Cable support rail (outdoor distribution box)
- Swivelling lever handle for profile half cylinder, single or double closing with lock cover; double-bit
- Colour: RAL 7035 light grey
- Protection type: IP43/IP44/IP54

Technical data

- According to technical connection conditions of the respective mains power supply operator
- Options:
 - Monitoring technology (voltage, Frequency, asymmetry)
 - Network management

Further equipment variations can be obtained upon request.
