

ENERGY
FOR TOMORROW

GREEN ENERGY PRODUCTS

GALILEO SOLAR TRACKER

- > 20 years warranty for all structure components.
- > Easy installation due to modular structure avoiding the use of a big crane.
- > No hydraulics – minimum maintenance requirements.
- > Absence of galvanic corrosion phenomenon due to hot dipped galvanized structure.
- > Low power consumption and accurate sun tracking through 2 DC motors.
- > Emergency operation.
- > Telemetry system.
- > 36% more energy production compared with systems with fixed structures.

FIXED STRUCTURES

FOR PHOTOVOLTAIC SYSTEMS

- > Rigid hot dipped galvanized structure for trouble – free long term installations.
- > Modular design.
- > Easy to install due to pre-assembled parts.
- > Three options for ground mounting (concrete, screw or post installation).

RESIDENTIAL PHOTOVOLTAIC SYSTEMS

- > Small scale PV systems specially designed for reduction of shading.
- > Components are very easy to assemble as they come ready to use from the factory.
- > Solutions for every kind of roof (flat roof, tile roof, industrial panel etc.)

WIND ENERGY GENERATORS

- > Small scale wind generation up to 50 kWp.
- > Flexible connection to the grid through inverter or storage to batteries.

HYBRID SYSTEMS

- > Wind energy / photovoltaic hybrid systems for off-grid installations.
- > Custom made solutions designed specially for each purpose.
- > Can be combined with parallel stand-by connection to the grid.
- > Autonomous operation with minimum LOLP (Loss Of Load Operation) for residential buildings.
