

# 300 kg

## Lifting straps (patented)

### Lifting Straps

These Lifting Straps are a pair of straps that are ergonomically designed to encourage proper lifting techniques to reduce back injuries due to heavy and repetitive lifting. These straps employ leverage which makes the items being carried seem 66% lighter. This makes it much easier to go up and down a flight of stairs, and to turn around corners. These Lifting Straps save floors from scratches, dents, scuffs and scrapes that dollies and hand trucks leave behind. They are adjustable up to 122 cm so you can easily carry SM, MED, LG and XL items. Forearm Forklift Lifting Straps are portable and they can conveniently be stored in a drawer, tool box or under a truck seat. Forearm Forklift Lifting Straps are affordable, safe, ergonomically designed, adjustable and portable.
