

OKS 3710

Low-Temperature Oil for Food Processing Technology

Description

Fuly synthetic oil for food processing technology that can also be used at extremyl low temperatures to -60°C.

Applications

- Fully synthetic oil for use at permanently low temperatures in NSF H1 registered all areas of the food processing industry, for example in cold storage houses, shock freezers, etc.
- Chain lubrication at arctic temperatures

Branches

- · Catering equipment and food processing technology
- · Shipbuilding and marine technology
- Chemical industry
- · Iron and steel industry
- · Plant and machine (tool) engineering
- Municipal services
- · Glass and foundry industry
- · Rail vehicle technology
- · Logistics
- Rubber and plastic processing
- · Paper and packaging industry

Application tips

Clean the lubricating point thoroughly for optimal effect. Apply a sufficient amount of OKS 3710 with a brush, drip oiler, by immersion or using a suitable automatic lubrication system. In as far as available, observe the machine manufacturer's instructions. Assess the lubrication frequency and quantity on basis of service conditions. Only mix with suitable lubricants.

Packaging

5 | Canister

25 | Canister

200 | Drum

Advantages and benefits

- Excellent low-temperature behaviour
- · Good ageing and oxidation stability through optimal additives
- · Cold and hot water resistant
- Resistant to water steam, as well as disinfectants and cleaning agents
- Long economic operating times
- Also available as spray version OKS 3711
- MOSH/MOAH-free (as per recipe)
