Until 2008, the Greek (domestic) market represented 65% of Doppler's annual sales. Now, however, this ratio is reversed, with exports holding the largest sales share (66%). Doppler's export orientation and the considerable presence in Northern Europe litt markets is a sure proof of the capability of the company and the quality level of products and services. The main foreign markets are UK and Russia, each covering 9% of the total sales.
