**Highly Accurate Air/Gas Velocity
Sensor for Industrial Applications**

EE75

Highly Accurate Air/Gas Velocity Sensor for Industrial Applications

The EE75 air velocity (v) and temperature (T) sensor is optimized for best measurement results in challenging air flow applications in most various industries.

Outstanding Measurement Performance

With its multipoint v factory adjustment the EE75 meets the highest accuracy requirements. The E+E thin-film sensing element employed operates on the hot-film anemometer principle, which stands for excellent accuracy from 0.06 m/s (12 ft/min) up to 40 m/s (8000 ft/min) and low angular dependency. The integrated temperature compensation combined with the robust mechanical design, makes the EE75 suitable for process temperatures from -40 °C (-40 °F) up to 120 °C (248 °F).

Versatility

The EE75 is available for duct mount as well as with remote probe in various probe lengths. The remote probe types feature different cable lengths and pressure tight versions up to 10 bar (145 psi). The IP65/NEMA 4 rated metal enclosure facilitates easy installation and maintenance. The v and T measured data is available on two current or voltage analogue outputs. In addition to v and T values EE75 calculates the volume flow V' in m³/min or ft³/min.

Configurable and Adjustable

The setup and adjustment of the EE75 can be easily performed using the configuration software and USB interface cable included in the scope of supply.

EE75 for duct mount

EE75 with remote probe

EE75 with remote probe, pressure-tight up to 10 bar (145 psi)

Features

EE75 Sensor

- Highly accurate over the entire working range
- Combined v and T measurement
- Integrated T compensation
- Optional display with backlight and menu buttons
- Easy mounting and maintenance
- Voltage or current output, selectable
- Low-flow suppression
- Calculation of volume flow V'

EE75 Sensing Head and Probe

- Measuring range from -40 °C (-40 °F) up to 120 °C (248 °F) and 10 bar (145 psi)
- Accurate measurement of air flows from 0.06 m/s up to 40 m/s (12...8000 ft/min)
- Low angular dependency
- Long-term stable

Application Specific Design

- Duct mount and remote probe types with different probe lengths
- Pressure tight remote probes up to 10 bar (145 psi)
- Various cable lengths for remote probe types
- Process connection with stainless steel flange or G 1/2" ISO / 1/2" NPT thread

Adjustment and Configuration

- v and T adjustment
- Scalable measuring range
- Selectable output signal
- Response time
- Calculation of volume flow

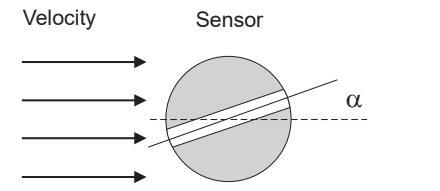

Inspection Certificate

according to DIN EN 10204-3.1 with three v points

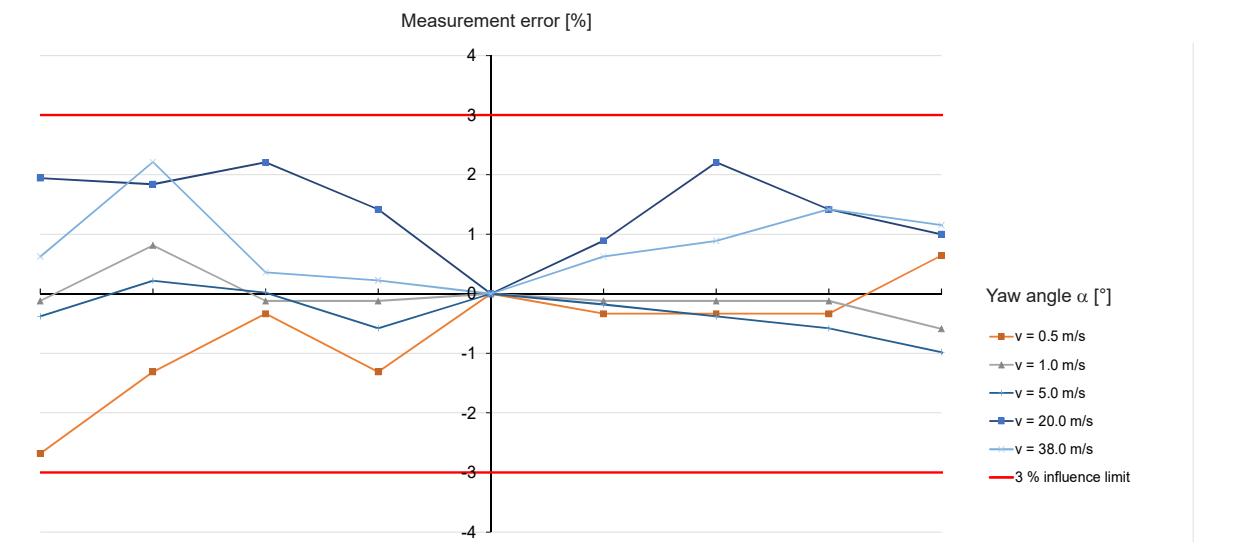

Features

Angular Dependency

The innovative design of the probe head minimises the effect of the angle of inflow (yaw angle) on the measuring result. The deviation of the measuring value remains <3 % up to a yaw angle α of $\pm 20^\circ$ between the direction of inflow and the sensor element's longitudinal axis.

EE75 sensing head in the flow

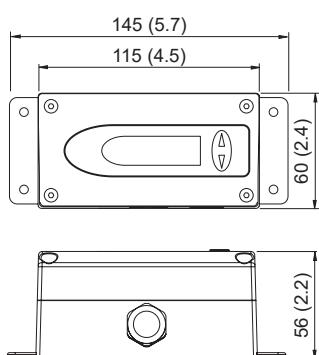

Measurement error over yaw angle for different velocities

Dimensions

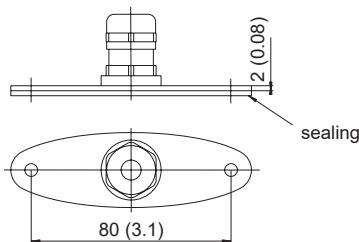

Values in mm (inch)

Enclosure

Mounting flange

for Types T2 and T3 (included in the scope of supply)

		Air	No code	
Medium	Medium	Nitrogen	FU2	
		CO ₂	FU3	
		Argon	FU7	
		Value in mm ² /inch ²	DCValue	

1) Applies to both outputs.

2) Measurands for output 1 and output 2 need to be either metric or non-metric.

3) Only in combination with Volume flow measurement Mx89: value in mm² / Mx90: value in inch².

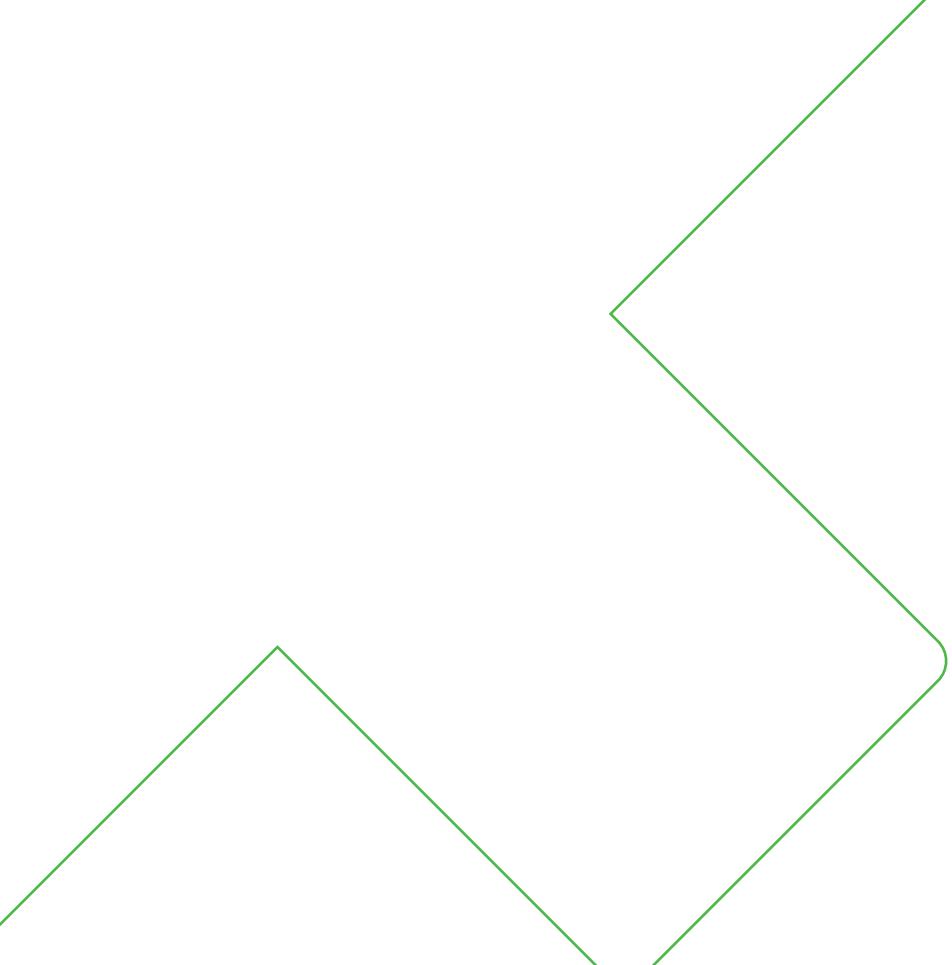

Ordering Example

EE75-T26A6HV30L400K10D2PA29SAL-20SAH120SBH20

Feature	Code	Description
Type	T26	Remote Probe, pressure tight, 10 bar
Output	A6	4 - 20 mA
Measuring Range	HV30	0...40 m/s (0...8 000 ft/min)
Probe length	L400	400 mm (15.75")
Probe cable length	K10	10 m (32.8 ft)
Display	D2	Display with backlight
Process connection	PA29	G 1/2" ISO - cut-in fitting, Ø8 mm (0.31")
Electrical connection	No code	Cable glands
Output 1 measurand	No code	Temperature T [°C]
Output 1 scaling low	SAL-20	-20 °C
Output 1 scaling high	SAH120	120 °C
Output 2 measurand	No code	Air velocity v [m/s]
Output 2 scaling low	No code	0 m/s
Output 2 scaling high	SBH20	20 m/s
Medium	No code	Air

EE75-T2A6HV26L600E4MA21SAH2000MB90SBH2000FU2DC200

Feature	Code	Description
Type	T2	Duct mount
Output	A6	4 - 20 mA
Measuring Range	HV26	0...10 m/s (0...2 000 ft/min)
Probe length	L600	600 mm (23.62")
Probe cable length	No code	Not applicable
Display	D2	Display with backlight
Electrical connection	E4	1 x plug for power supply and outputs
Output 1 measurand	MA21	Air velocity v [ft/min]
Output 1 scaling low	No code	0 ft/min
Output 1 scaling high	SAH2000	2000 ft/min
Output 2 measurand	MB90	Volume flow V' [ft ³ /min]
Output 2 scaling low	No code	0 ft ³ /min
Output 2 scaling high	SBH2000	2000 ft ³ /min
Medium	FU2	Nitrogen
Duct cross section	DC200	200 inch ²
