What is Panel Cladding Brick?

Smartclad[®] is a colored panel-type clay brick that is used for external cladding. With its easiness of application, it saves time and labour cost for builders and facade contractors. Thanks to its stylish look and strength, Smartclad[®] is ideal for cladding exterior facades of buildings with modern outlook.

Benefits of Use

- A1 Fire Rated, Non-Combustible
- Environment friendly as it is made of clay, totally recyclable.
- Resistant against all types of climatic conditions such as extreme heat, frost, and intense humidity and UV lights.
- Easy to apply with its pre-made screw holes.
- Available in 4 different colours; Flamed Red, Anthracite, Plain Red and Brown
- Keeps maintenance costs at minimum due its strength against external conditions.

FAQs
