Croc Lock

An amazing work bench for many applications such as for example holding doors, fences, wood, ceiling boards, bikes, metal, automotive components and many other items.

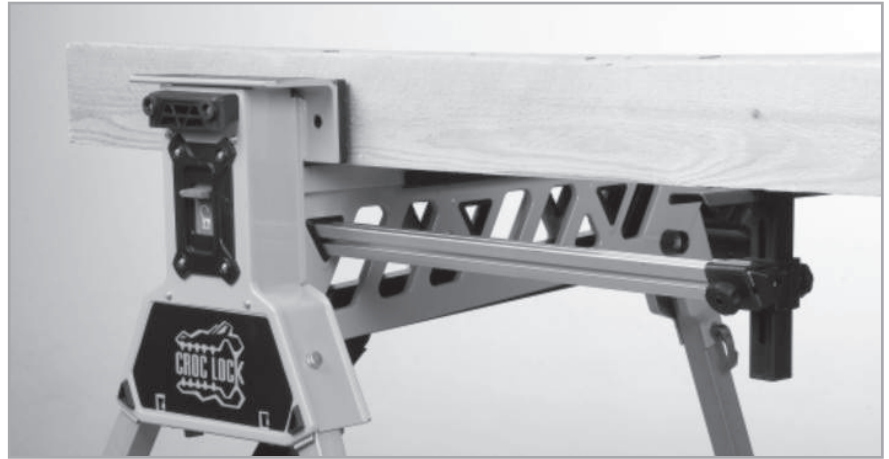

Powerful clamping system, with a strength of up to 1000 kg.

The foot operated clamping system allows both hands to be free.

The lock knob provides a quick release of each sort of clamped material.

A wide and unique selection of accessory possibilities for the Croc Lock can be ordered separately.

Working height: 875 mm
Max. load: 150 kg
Clamping range: 0 - 956 mm

Croc Lock

Multifunctional: An amazing work bench for many applications such as for example holding doors, fences, wood, ceiling boards, bikes, metal, automotive components and many other items.

Power: The portable work- and clamping Croc Lock system provides a powerful clamping system, with a strength of up to 1000 kg, that allows as much and as little clamping force needed for the used material. Even an egg can be clamped without breaking it.

Hands free: The foot operated clamping system allow both hands to be free, allowing your hands to control the job on a working level of 87.5 cm.

Quick: The lock knob provides a quick release of each sort of clamped material.

Working range: The clamping system operates in two positions, by turning the clamp rail around (180°) this will allow a larger clamping position for example doors up to a clamping length of 956 mm (soft jaw pads removed).

Stability: The tripod base with foot pads allows to even operate safely on uneven surfaces.

Practical: Assembly is quick, and it's as quickly folded up for storage. It comes with carry handles for easy transportation.

Accessories: A wide and unique selection of accessory possibilities for the CROC LOCK can be ordered separately.
