

**CUSTOMIZED  
DESIGN**

#### Features and benefits

- Maximum flexibility in your design
- Choose your required gauge line length
- Radial length adjustment module possible

## ETP HYDRO-GRIP<sup>®</sup>

### Design your own hydraulic precision toolholder

ETP HYDRO-GRIP can be made to your specific gauge line length requirement, using our modular design possibility.

Combine any machine shank available in our assortment, with

any tool dimension (12 – 32 mm). With an intermediate sleeve, ETP offers you your customized toolholder to any required gauge length (up to 400 mm).

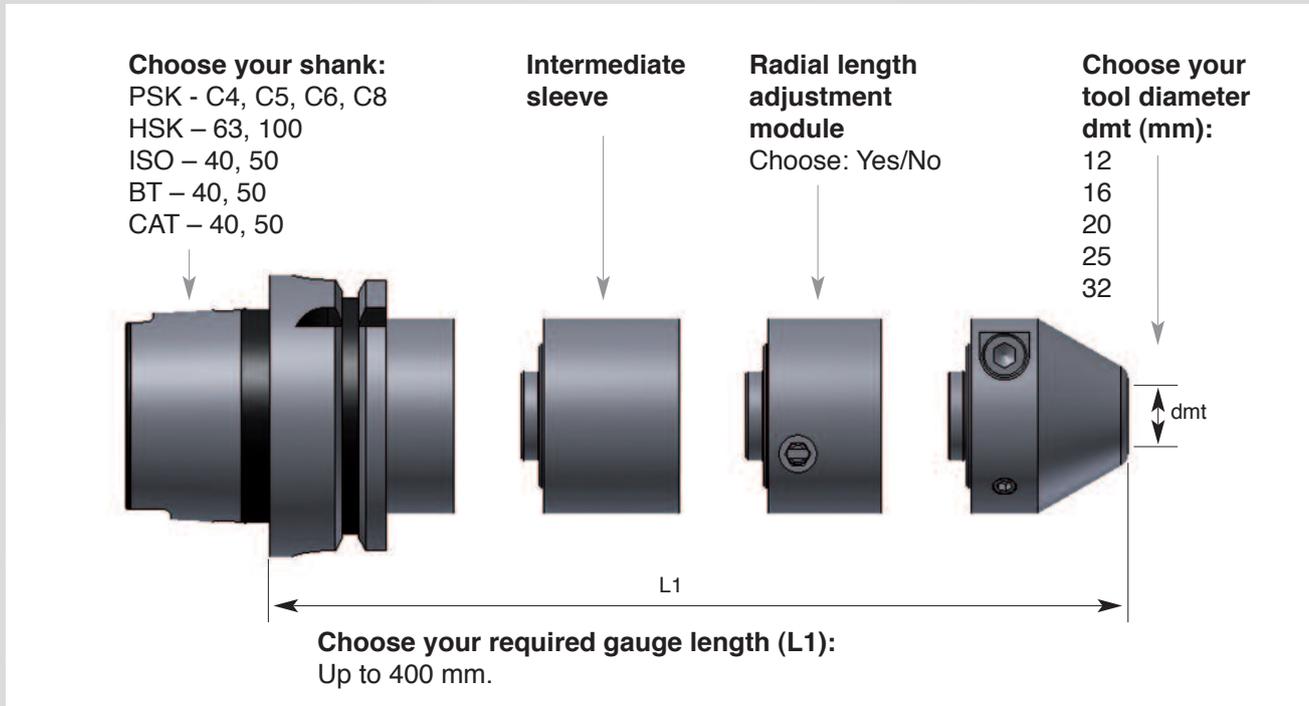

These customized toolholders

offer the same rigid design, dampening properties and high runout precision as our standard assortment.

# ETP HYDRO-GRIP®

## Design your own hydraulic precision toolholder
