

# GEDA<sup>®</sup> 850 ZM P

**Robust, durable material hoist**

**Maintenance-friendly design**

**No machine room required**

**GEDA UNI-X-MAST system**

**Automatic lubrication device as  
a standard**

### GEDA 850 ZM P

The GEDA 850 ZM P material hoist is installed as a convenient transport system for the warehousing and logistics functions in many different sectors.

The spacious platform without roof provides space for up to 850 kg of materials and transports all goods safely and efficiently up to a height of 100 m. At the press of a button, the material hoist takes over all the heavy lifting.

For a limited number of instructed users, the GEDA 850 ZM P can be installed on machines and on buildings in non-public areas. A separate TÜV acceptance is not required.
