## AIR MOTION – Movement redesigned.

The new smooth-action sliding systems made by Schöck Metall are an entirely new product generation based on traditional telescopic slide profiles. They utilize a completely new range of convenience features based on our proven ball bearing slide technology.

The concept of AIR MOTION stands for excellent smooth operation, comfortable feel, high resilience and long durability. You can feel the impact this has on the quality of the overall system.

With a unique combination of material and manufacturing expertise, Schöck Metall has developed the fundamentals behind this new high-quality smooth operation.

AIR MOTION ball bearing slides are customized for your respective project according to your requirements. Added optional product features such as a powder-coated surface or integrated locking and damping systems are available.

### Benefits for our customers:

- Exceptionally smooth and quiet operation
- Comfortable feel
- High resilience
- Long, maintenance-free service life
- High-quality appearance
