

# NK BIT

***NK Bits exclusively for air and electric screwdrivers !***

Fit in most screwdrivers with wide variety of bit types & sizes produced under tight quality control.

# NK BIT

## The "NK Bits" best fit for pneumatic and electric screwdrivers!

Bit is the key element connecting the screwdriver and the screw itself requiring high precision shank dimensions, high impact and wearing durability suitable to each fastening condition, and best compatibility with the screw.

"NK Bits" adopt special alloy exclusively refined for screw bits and are finished with high quality by fulfilling all essential requirements for bits applying best reserved machining and heat treatment technologies.

Further, you can select the right bit for your specific fastening requirements from the wide range of "NK Bits".

### Features

#### High precision

- Consistent production from the raw material to the finished product realizes the uniform quality.
- Designed for the best compatibility with tools and screws.
- Minimized oscillation of bit axis

#### Long life

- Special alloy exclusive for screw bits is adopted.
- Long life is realized by strict hardness control.

#### Low price

- Low price is realized by consistent production.

### About the hardness

Your appropriate selection of the bit hardness for each application will ensure better durability.

#### "NK Bits" Hardness Standard

Hardness Grade	Applicable to (as guideline)	Standard Model Examples
H (Hardest)	Screw size 1 ~ 3mm	NK4D, NK4DH, NK5H
G (Standard)	Screw size 3.5 ~ 5mm	NK31, NK35, NK39, NK15, NK16, NK13, NK12
E (Medium hard)	Screw size 6mm	
F (Least hard)	Bolts, Nuts	NK4DB, NK4DHB, NK31B, NK35B, NK39B

- ★ Hardness standard is set as shown above considering the load factors by the screw size.
- ★ If excess wear is seen, ask us for X grade, the extreme hardness. If frequent break is seen, ask us for the hardness lower than the listed. Consult your supplier.

**In order to correspond to the best fastening conditions, we will comply to the following special orders.**

- Bits with special hardness
- Bits with indicated length
- Bits with the indicated surface treatment
- Optional accessory to magnetize bits

★ For special made to order, the price varies depending on the production quantity. Always suggest us the quantity.

## How to select the bit

(basic guideline)

Bits are variously classified by the type of tools to be mounted on or screws they are used for. With wide product range, "NK Bits" comply with almost all the fastening operations.

Bits are classified into the following models by shank shape and screw type of the tool used.

Make selection in the following order ;

Type of shank shape ▶ Screw type ▶ Bit model ▶ Size

SHANK SHAPE	POINT TYPE	MODEL	SEE PAGE
