Packaging:

Bulk in plastic bags – minimum quantity 100 pcs/value
 Waffle-Pack / Gel-Tray (JEDEC 2“) – minimum 100 pcs./value (sizes 0402, 0603 and 0805 only)
 Embossed carrier tape acc. to IEC 60286-3 – min. 500 pcs/value (0402 in punched carrier tape)
 Reel diameter 180 mm or 330 mm

- Orientation in tape:
- face-up for wire bonding
 - face-down for flip-chip assembly

The orientation in the tape is to specify with order. If not specified face-down is used as standard.

Ordering Data:

Gold termination for face-up assembly (wire bonding)

Type – value – tolerance – temperature coefficient TK – termination – (component orientation in tape)

Example: CBW 0603 100K ±5% TK100 Au – (face-up)

AgPd termination for face-down assembly (flip chip) – (component orientation in tape)

Type – value – tolerance – temperature coefficient TK – (component orientation in tape)

Example: CBW 0603 1G ±20% TK1000 – (face-down)

If no requirements for TK and packaging are given, the highest value in table will be supplied and packaging is bulk. Standard measuring voltage is 10V. Different voltages on request and agreement (specify explicitly). Without specification the termination is AgPd for flip-chip application.
