

Ergomodul

The all-round labeller

For all who shoot for the moon

The EM series of the KRONES labelling technology has the suitable machine for each application. It comprises three main machines, six table diameters, seven labelling station types and it offers numerous options for combining the individual elements with each other. The Ergomodul is its technological spearhead: A lean, highly efficient machine for ultraflexible applications.

At a glance

- High-tech model of the KRONES EM-series
- Columnless machine with exchangeable labelling stations
- Labelling method and speed:
 - Pre-cut labels with cold glue up to 72,000 containers per hour
 - Pre-cut labels with hotmelt up to 72,000 containers per hour
 - Reel-fed labels with hotmelt up to 81,000 containers per hour
 - Self-adhesive reel-fed labels up to 60,000 containers per hour

The EM-series: All models at a glance

	Pre-cut label application with cold glue	Reel-fed labelling with hotmelt	Pre-cut label application with hotmelt	Reel-fed labelling with self-adhesive labels
Machine with table top	Ergomatic	Contiroll	Canmatic	Autocol
Columnless machine with fixed labelling stations	Ergomatic Pro	— *	Canmatic Pro	Autocol Pro
Columnless machine with exchangeable labelling stations	Ergomodul			

* In the EM series, the Contiroll function is covered by the Ergomodul with a Contiroll labelling station.

Technical features

Material

- Table top and machine support made of stainless steel
- Container table made of aluminium
- Option: Completely in stainless steel design

Benefits to you

- Rigid design, easy maintenance and long service life

Technical features

Dimensions

- Slim main machine
- Significantly reduced footprint in comparison to other labellers

Benefits to you

- Ease of installation – particularly when replacing existing machines
- Reduced transportation costs
- Can be easily integrated in all kinds of different lines and hall layout

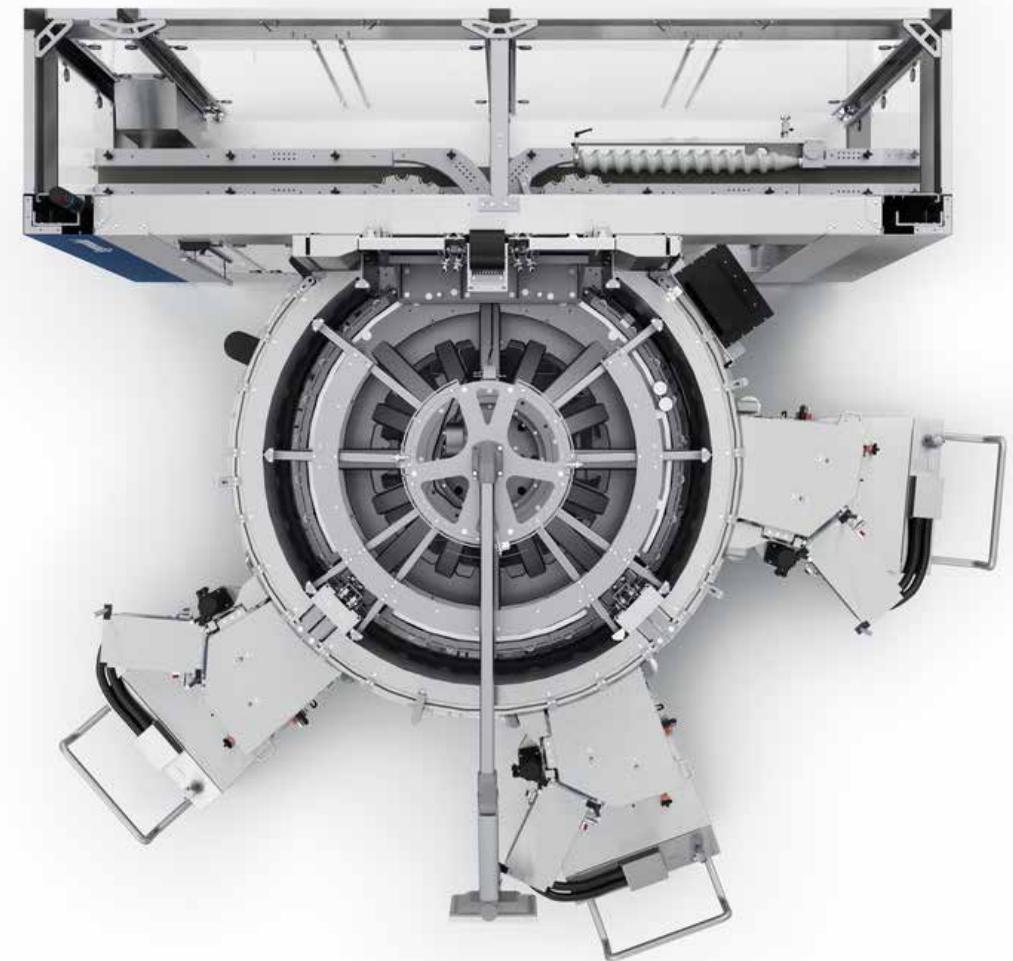

Technical features

Servo drives use throughout all applications

- Main drive
- Infeed and discharge starwheels
- Infeed worm

Benefits to you

- No lubrication required
- Reduced noise
- High energy efficiency
- No stop starwheel required
and therefore fewer handling parts
and shorter change-over times
- Increased efficiency through increased coupling speed
- Preventative condition monitoring with feedback from the motor parameters
- Electronic overload clutch through torque limiting
- Very little warehousing thanks to the use of the same motors throughout the entire machine

Technical features

Machine design

- Newly created machine layout
 - Ergonomic replacement of the brushing-on unit, container plate and centring bells
 - Optimal use of the brushing-on distances
- Stand-alone labelling stations
 - Optimal accessibility from three sides
- Lift-guard with integrated safety switches
- Hygienic design
 - Optimal cleaning properties

Touch-screen

- Optimal accessibility thanks to height-adjustable pivoting arm
- One single operator panel for the main machine, labelling stations and all PLCs
 - Central saving of all parameters
 - No double inputs
 - No errors

Benefits to you

Reduced complexity as a red string:

- Top ergonomic design
- Ease of operation

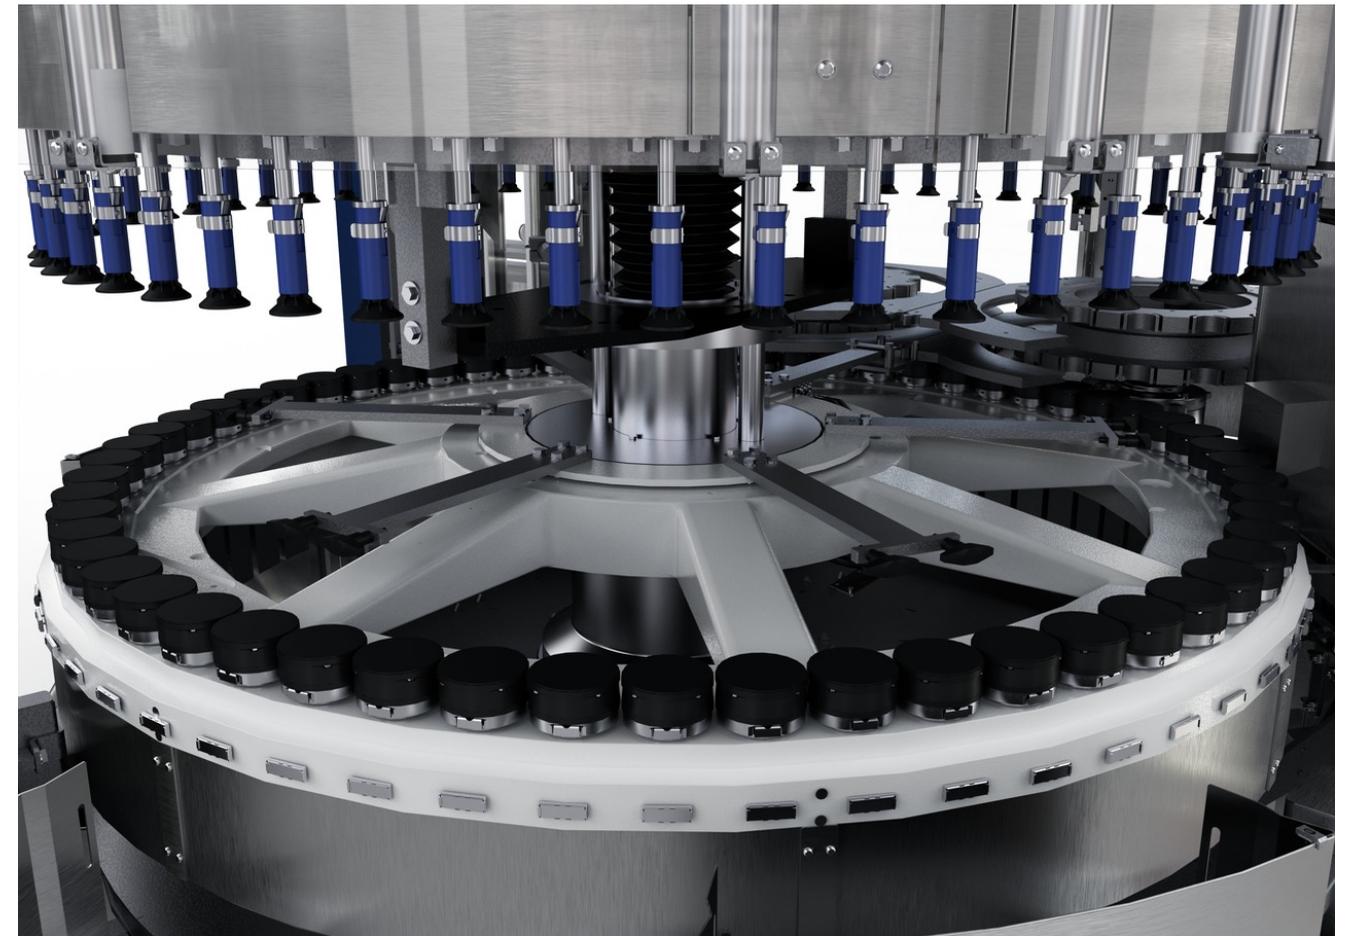

Technical features

Bottle plate control

- Separately-driven servo motors
- All components are UL certified
- Separate supply ensures easy restart after an EMERGENCY STOP
- Well-arranged visualisation system on the touch-screen
- Processing of subcams possible
- Prepared for condition monitoring
- Complete diagnostic capability thanks to new bus system
- Motor replacement with the Plug & Play principle

Benefits to you

- Drive technology of the latest generation
- Significant reduction of the maintenance-relevant downtimes
- Certified safety
- Easy operation

Labelling stations: Technical features

- Changeable labelling stations
- Connection with the Plug & Label principle
- Automatic connection of the supply lines for air, water, power and data
- Integrated motorised height adjustment system
- Version in hygienic design

Benefits to you

- Maximum flexibility: all labelling methods possible on one and the same machine
- Short change-over times
- Elimination of operating faults
- Optimal cleaning properties
- No handling parts required for the height adjustment

Labelling stations: All models at a glance

Ergomatic
Pre-cut labels
with cold glue

Contiroll
Reel-fed labels
with hotmelt

Canmatic
Pre-cut labels
with hotmelt

Autocol
Reel-fed, self-
adhesive labels

CL: Classic

- For the low to the medium output range
- Low investment costs
- Combination of well-proven KRONES technology and new developments

TS: Top Speed

- For the high output range
- Advanced functions
- Top flexibility

All can be combined
with all main machines

Ergomatic CL

Labelling station for pre-cut labels with cold glue

Technical features and benefits

- Hygienic design
 - Optimal cleaning properties
- Polygon holders for glue roller, pallets and gripper cylinders
 - High-precision container decoration
- All parameters saved in the operator program
 - Exactly reproducible settings

Options

- Stainless steel labelling housing
- Automatic magazine loading system

Contiroll CL

Labelling stations for reel-fed labelling with hotmelt – low and medium output range

Technical features and benefits

- Hygienic design
 - Optimal cleaning properties
- Light-weight vacuum-grip cylinder
- Optimum accessibility
 - Reduced change-over time by up to 20 percent
- Newly developed gluing unit
 - Absolute control over the glue application
 - Reduced heat-up phase by up to 20 percent
 - Reduced energy consumption by up to 15 percent

Options:

- Equipment for automatic splicing
- Increased output due to servo drive for reel holders
- Unit for the detection of splicing points
- Antistatic equipment
- Markless sensor

Contiroll TS

Labelling stations for reel-fed labelling with hotmelt – high output range

Technical features and benefits

- Hygienic design
 - Optimal cleaning properties
- Light-weight vacuum-grip cylinder
- Optimum accessibility
- Reduced change-over time by up to 20 percent
- Newly developed gluing unit
 - Absolute control over the glue application
 - Reduced heat-up phase by up to 20 percent
 - Reduced energy consumption by up to 15 percent
- Automatic reel splicing unit
- Electronic cutting unit
 - Guaranteed cutter replacement not required earlier than after 120 million cuts
 - Necessary time for cutter replacement: 1 minute – without service personnel
- Overlap correction possible during production

Options

- Unit for the detection of splicing points
- Antistatic equipment
- Markless sensor

Canmatic CL Labelling station for pre-cut labels with hotmelt

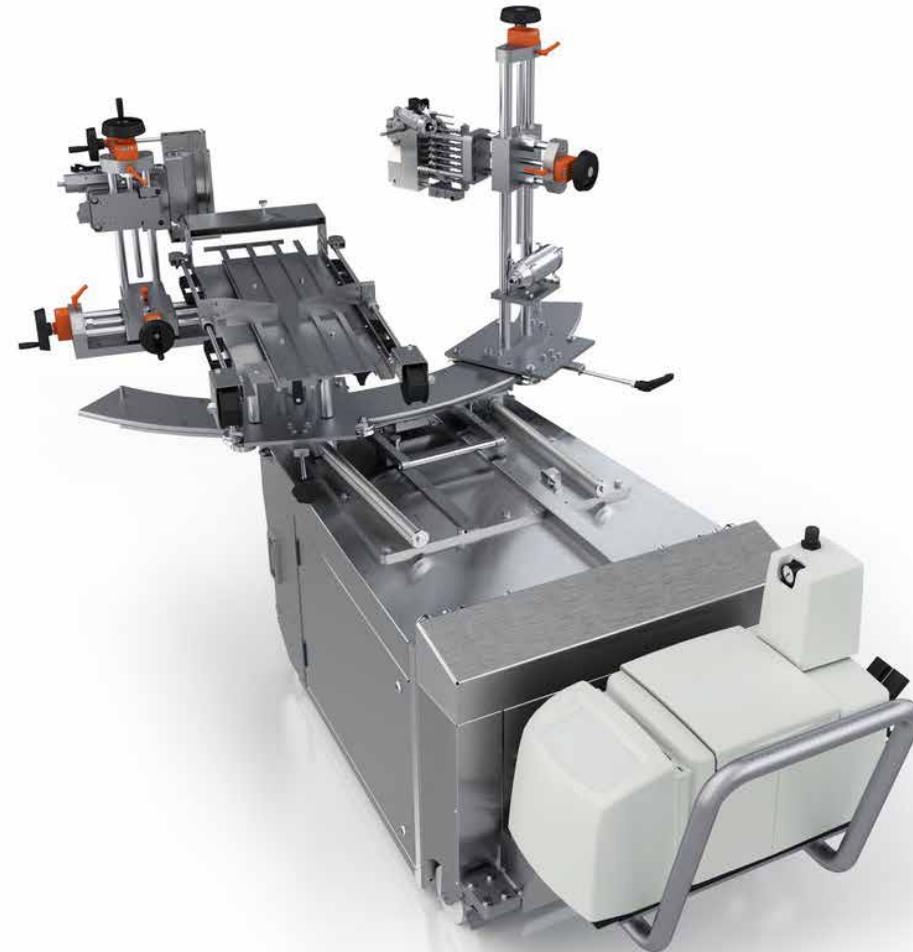

Technical features and benefits

- Overlap correction possible during production
- Robust technology for leading-edge gluing and trailing-edge gluing
 - Output: up to 72,000 containers per hour

Option

- Completely integrated hotmelt spraying device
 - Contact-free glue application
 - Closed glue system
 - Glue consumption reduced by 50 percent
 - Operation via a central touch-screen

Autocol CL

Labelling stations for self-adhesive labelling – low and medium output range

Technical features and benefits

- Outputs of up to 60 meters per minute
- Operation without any pneumatic components
 - Reduced consumption costs
- Ultrasonic sensor independent from the materials
 - Precise label position
- Four-axes adjustment
- Adjustment indicators for all installation possibilities
- Simple belt guidance and driven feed unit
 - Suitable for multi-layer labels
 - Processing of even ultra-thin labels
- Compact design
 - Top accessibility
 - Ideally suited as an additional labelling station
- Use of the same motors
 - Reduced warehousing

Option

- AUTO-change: Installation of both applicators on one modular labelling station

Autocol TS

Labelling stations for self-adhesive labelling – high output range

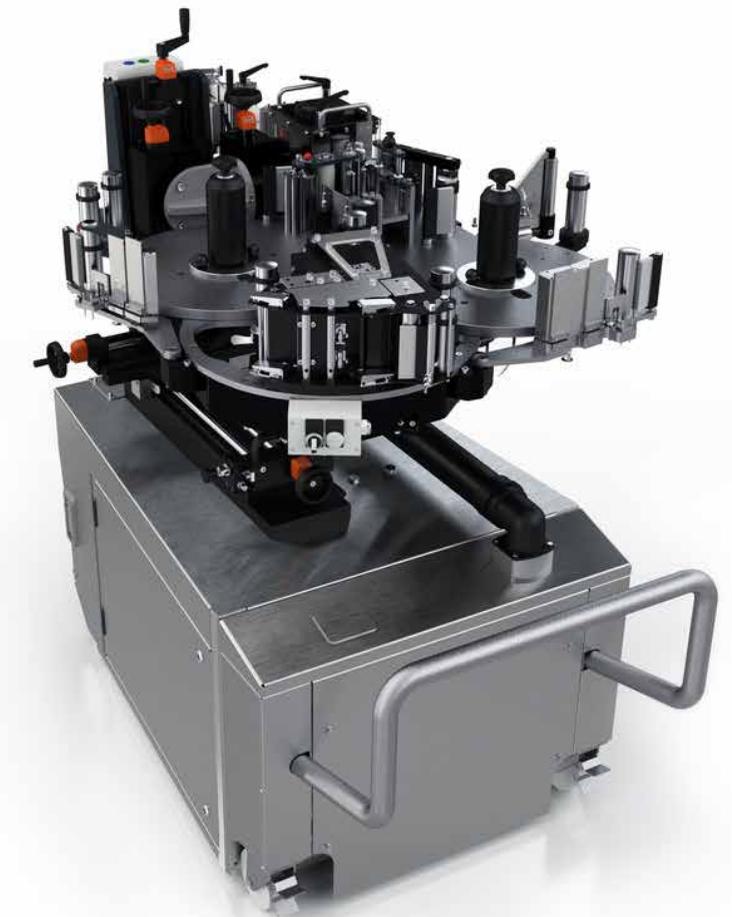

Technical features and benefits

- Outputs of up to 180 meters per minute
- Ultrasonic sensor independent from the materials
 - Precise label position
- Four-axes adjustment
- Adjustment indicators for all installation possibilities
- All parameters integrated in the central operator touch-screen program
 - Easy reproducibility of the adjustments
- Feed/tension roller technique
 - Utmost precision: +/- 0.2 mm at the application wedge
- Electronic contact-free buffer system
 - Processing of even ultra-thin labels
- Two reel holders
 - Best operating comfort

Options

- AUTO-change: Installation of both applicators on one modular labelling station
- Automatic splicing
- Five-axes adjustment

Benefits to you

Custom-fit technology

The Ergomodul can be equipped with various labelling techniques, labelling station types and optional packages. Simply pick your suitable elements and create your individual machine.

Technology from a single source

Everything fits together here: Right from the start, the complete EM series was designed as a homogeneous product series. Disregarding of how you will configure your machine – the individual components will always seamlessly fit into each other and push each other to the highest performance.

Efficiency as a red thread

How can you perform a lot with little input? The new KRONES labellers will show you exactly how that works. Regardless of whether talking about the spare parts management, the footprint, the operator effort or the energy consumption: This complex series has been designed for the maximum efficiency up to the smallest detail.

Investment for the future

The EM series comprises all the know-how of more than 70 years of KRONES development. The result? An advanced machine series which particularly provides you with the following: the certainty to be equipped for any challenge of the future.

Linadry Container dryer for a clean labelling result

Technical features

- Stainless steel design
- Frequency-controlled blower with 11 kW
- Integration of visualisation system, controller and monitoring system in the labeller
- Noise level: Max. 83 dB
- Option: Automatic cleaning

Benefits to you

- Rigid construction
- Reduced energy consumption
- Easy handling
- Noise reduction

Checkmat Inspector for every application

Technical features

- Different inspection options such as
 - Label presence
 - Detection of the splicing point
 - Excessively high labels
 - etc.
- Automatic rejection of faulty containers
- Extensive statistics
- Data exchange with base machine
- No manual adjustment required for different containers

Benefits to you

- Individual inspector configuration
- Reliability for your production
- Relief for the operators

Dating device

- Designed as ink-jet coding/dating device or laser printer
- Signal exchange with base machine
- Already set up in the KRONES factory

Professional assistance around the clock

Remote maintenance is performed on the Ergomodul via the GRS (Global Remote Service) remote service platform. If required, a KRONES expert accesses the machine via a safe internet connection in order to, for example,

- optimise your settings.
- set up new container and label types.
- train the production/operator staff.

Benefits to you

- Available at any time
 - 24 hours a day, and 7 days a week
- Cost savings:
 - No travel time, immediate access
- Maximum safety
 - Connection can only be established by customer!

Certified ecological efficiency: Machines with enviro certification

At KRONES, the blue enviro label stands for excellent ecological efficiency. Products that bear the enviro label have proven in an objective test procedure that they efficiently use energy and media, and that they produce in an environmentally friendly way. The requirements are defined by the EME standard that has been developed by the TÜV SÜD (technical inspection authority) for assessing production plants. The enviro test procedure has also been certified by TÜV SÜD as an independent expert. Therefore, you can be sure that an enviro label stands for ecological efficiency.

This is why the Ergomodul is enviro-classified:

- Use of servo motors of the efficiency class IE4 or similar
- No drive train lubrication required
- Always use of food-grade lubricants
- Leakage detection for compressed air
- Media measuring package and optional energy measuring package
- Significant reduction of the noise level
- Safety standards according to the Machinery Directive 2006/42 EG
- Consideration of the 2006/95/EG and EU-EMV Directives (2004/108/EG)
- Design according to:
 - EN ISO 12100
 - EN ISO 13849-1
 - EN 60204-1
 - EN 61000-6-2
 - EN 61000-6-4
 - EN 13849
 - EN 62061

Everything from a single source

KIC KRONES adhesives – the all-rounder for a strong grip

Regardless if PET or glass, plastic or paper, labels or packagings – at KIC KRONES, you will find your ideal adhesives for a high-quality product presentation.

KIC KRONES cleaning agents make your machine shine

Only if the production environment is immaculate, can your product be brilliant. KIC KRONES provides you with the optimum cleaning agents and disinfectants for each individual production step.

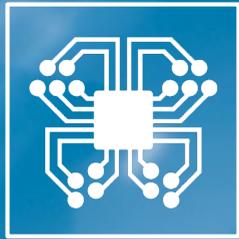

Lubricants from KIC KRONES for every production step

Whether for gears, chains or central lubrication systems – our greases and oils are true all-round talents. You can reach every lubrication point, protect your line and provide gentle treatment for your product thanks to our products' suitability for food.

KRONES Lifecycle Service – partner for performance

Also after having purchased a new machine, KRONES will take care of your line; the LCS experts are always ready to consult you and translate your goals and wishes into optimal LCS solutions.
