

TRANSTRON SERIES S / M / L / XL / CM / CL / CX

Metal Detection made in Germany means:

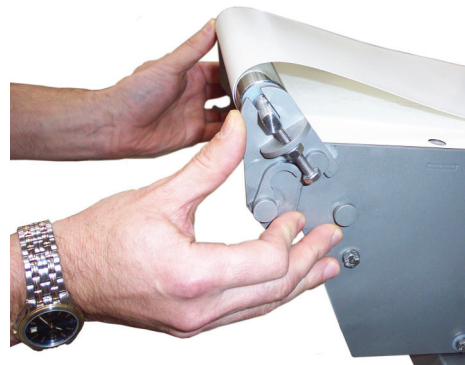

- Stable torsion resistant, stainless steel, tubular frame.
- Special model for wet applications.
- Available with a variety of options and dimensions.
- Proven technology for maximum uptime.
- First class finish – high quality materials.

» We develop the ideal conveyor technology for your application - individually planned and with first class quality. «

SPECIAL CONVEYING SYSTEMS

TRANSTRON SERIES S / M / L / XL / CM / CL / CX

VALUE ADDED

In addition to the classic function of product transport, MESUTRONIC conveyors fulfill the task of providing a safe environment for the metal detector. This is the only way to assure lasting, trouble-free metal detection results.

Individual system solutions planned and executed by MESUTRONIC, tailored to your product and prepared to be integrated into your processing line are the ideal conditions for a trouble free production.

INDIVIDUAL

TRANSTRON conveyors are tailor made according to the customer-specific application. Even extraordinary requirements are a welcome daily challenge. MESUTRONIC delivers fast and reliable perfectly fitting conveyors, for example...

...with central height adjustment.

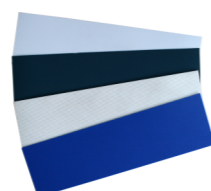

TREND-SETTING

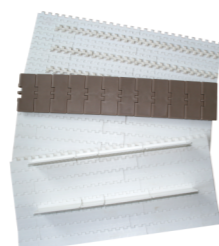

Adjustable **side walls** for trouble-free operation.

FLEXIBLE

MESUTRONIC move your materials safely and reliably with the proper **belt** material.

Standard belts

Chain belts

...for the transport of glass containers

...for tight spaces

...for special requirements

RELIABLE

The MESUTRONIC reject system detects and rejects metal contaminated products reliably and without process interruption.

SAFE

The lockable **reject material bin** guarantees that only authorized persons can access the rejected material.

PROTECTION

Separate cabinets for the **electrical** and **pneumatic** controls guarantee the optimum protection against outside interference. Maintenance can be performed without endangering the technician.

REJECTS SYSTEMS

Telescopic relaying

Flop gate

Reject blaster

Material pusher

Moveable arm
